

PRESERVING THE ENVIRONMENT THROUGH OUR MARINE PROTECTED AREA

PROTECTING THE MARINE HABITATS OF POINTE DES SANS-CULOTTES

Pointe des Sans-Culottes is home to remarkable and emblematic ecosystems of the Mediterranean. Hidden beneath these impressive rocky cliffs are forests of marine algae, seagrass meadows of Posidonia, a very rich deep coralliferous drop-off known as the "Tombant des Américains".

Protecting the marine habitats found in this area, which are heavily affected by human activities, is essential to ensure they remain in good condition.

2 NATURAL HABITAT PROTECTION ZONES

RECREATIONAL FISHING AND BOAT ANCHORING ARE PROHIBITED.

PROFESSIONAL FISHING IS AUTHORISED FOR FISHERS FROM THE PRUD'HOMIES of Nice and Villefranche-sur-Mer, using static gear or diving, from december 1st to july 31th.

Arrêté interpréfectoral signé le 21 janvier 2026 (n°015/2026 Préfet maritime)
